\*Resolution R3-2008, Section 6: Transfers of EDU connections shall be by one of two methods: (1) on a pro-rata basis, based on the holder's percentage of listed connections in relation to the total number of connections listed on the registry, if the number of connections sought for transfer is large enough to insure that each holder is allotted at least one EDU for transfer; or (2) by cycling through the list of holders on the registry and assigning one connection per holder in order of date priority as listed on the registry until the transfer request is exhausted. For this cycling method to be fair, each transfer request under the cycling method shall begin with the holder next in line following the previous cycling request.
